

1)

The screenshot shows the IntelliJ IDEA interface with a project named 'untitled4'. The 'Project' view on the left shows the file structure: 'src' > 'Main.kt'. The 'Main.kt' file is open in the editor, showing the following Kotlin code:

```
1 fun main() {  
2     val numbers = arrayOf(1, 2, 3, 4, 5)  
3  
4     for (number in numbers) {  
5         println(number)  
6     }  
7 }  
8
```

The 'Run' view at the bottom shows the execution command and the output:

```
C:\Users\StudentFSP0\jdk\openjdk-22.0.2\bin\java.exe -javaagent:C:\Program Files\JetBrains\IntelliJ IDEA Community Edition 2024.2.1\lib\idea_rt.jar=64249:C:\Program Files\JetBrains\IntelliJ IDEA Community Edition 2024.2.1\bin -Dfile.encoding=UTF-8  
1  
2  
3  
4  
5  
Process finished with exit code 0
```

2)

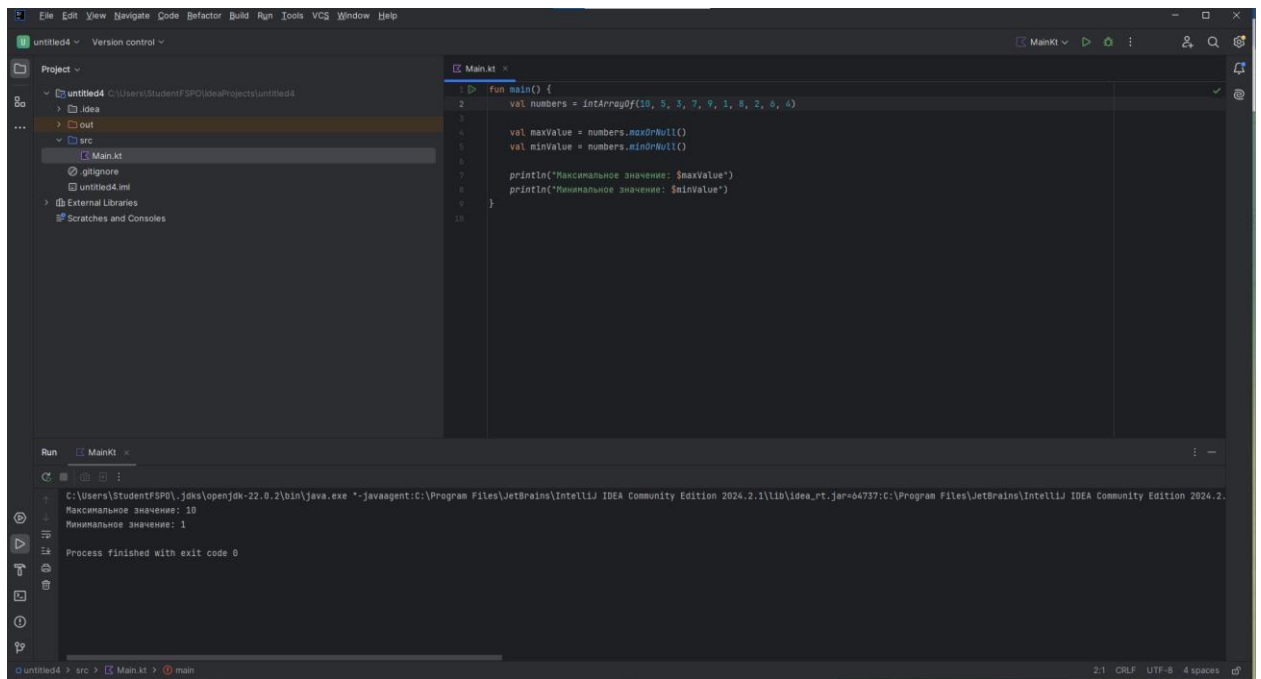

The screenshot shows the IntelliJ IDEA interface with the same project 'untitled4'. The 'Main.kt' file is open, showing the following Kotlin code:

```
1 fun main() {  
2     val numbers = arrayOf(1, 2, 3, 4, 5)  
3  
4     var sum = 0  
5  
6     for (number in numbers) {  
7         sum += number  
8     }  
9  
10    println("Сумма элементов массива: $sum")  
11 }  
12
```

The 'Run' view at the bottom shows the execution command and the output:

```
C:\Users\StudentFSP0\jdk\openjdk-22.0.2\bin\java.exe -javaagent:C:\Program Files\JetBrains\IntelliJ IDEA Community Edition 2024.2.1\lib\idea_rt.jar=64589:C:\Program Files\JetBrains\IntelliJ IDEA Community Edition 2024.2.1\bin -Dfile.encoding=UTF-8  
Сумма элементов массива: 15  
Process finished with exit code 0
```

4)

5)

The screenshot shows the IntelliJ IDEA IDE with a project named 'untitled4'. The 'Project' view on the left shows the file structure: 'src' > 'Main.kt'. The 'Main.kt' file is open in the editor, showing the following code:

```
1 fun main() {  
2     val numbers = intArrayOf(1, 2, 3, 2, 4, 5, 3, 6, 7, 8, 7, 9, 1, 5, 6, 2, 8, 3)  
3  
4     val uniqueNumbers = numbers.toSet()  
5  
6     println("Уникальные элементы массива:")  
7     for (number in uniqueNumbers) {  
8         println(number)  
9     }  
10 }  
11  
12
```

The 'Run' view at the bottom shows the output of the program:

```
Уникальные элементы массива:  
1  
2  
3  
4  
5  
6  
7  
8  
9  
35
```

6)

The screenshot shows the IntelliJ IDEA IDE with a project named 'untitled4'. The 'Project' view on the left shows the file structure: 'src' > 'Main.kt'. The 'Main.kt' file is open in the editor, showing the following code:

```
1 fun main() {  
2     val numbers = intArrayOf(1, 2, 3, 4, 5, 6, 7, 8, 9, 10)  
3  
4     val evenNumbers = mutableListOf<Int>()  
5     val oddNumbers = mutableListOf<Int>()  
6  
7     for (number in numbers) {  
8         if (number % 2 == 0) {  
9             evenNumbers.add(number)  
10        } else {  
11            oddNumbers.add(number)  
12        }  
13    }  
14  
15    println("Четные числа:")  
16    for (number in evenNumbers) {  
17        println(number)  
18    }  
19  
20    println("Нечетные числа:")  
21    for (number in oddNumbers) {  
22        println(number)  
23    }  
24 }  
25
```

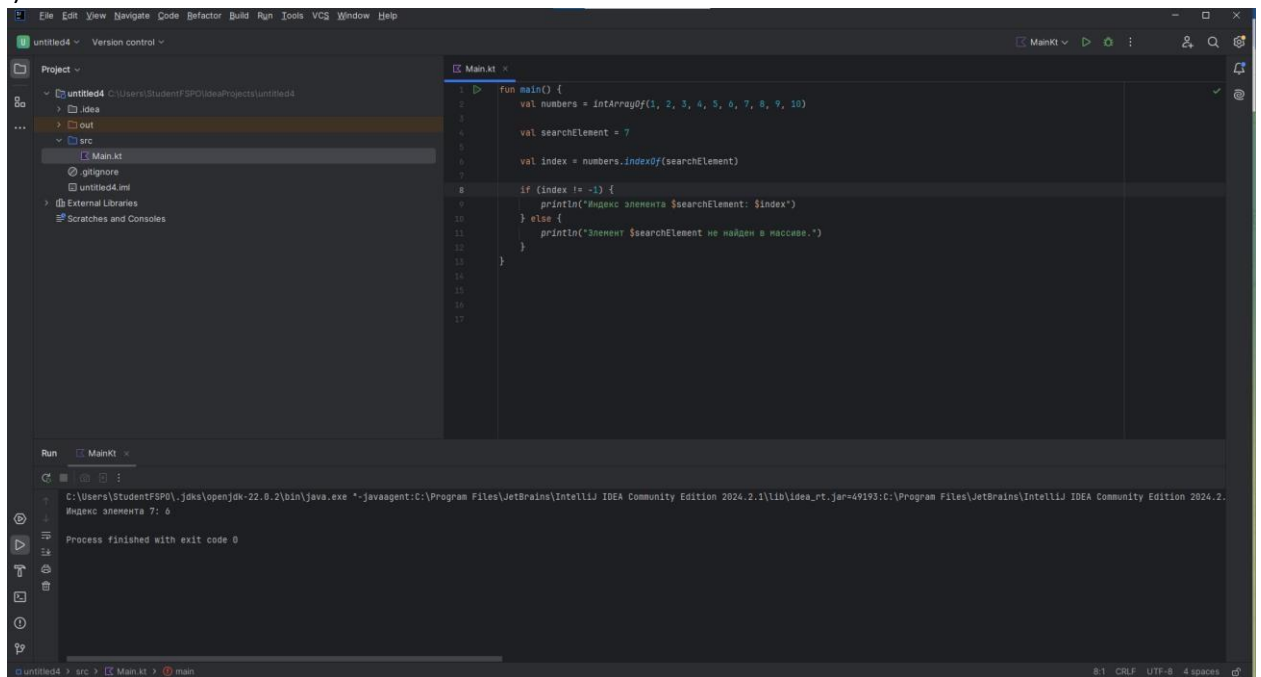

The 'Run' view at the bottom shows the output of the program:

```
Четные числа:  
2  
4  
6  
8  
10  
Нечетные числа:  
1  
3  
5  
7  
9
```

12)

13)

14)

15)

18)

```

19) fun main() {
    val array1 = intArrayOf(1, 3, 5, 7, 9)
    val array2 = intArrayOf(2, 4, 6, 8, 10)
    val mergedArray = mergeSortedArrays(array1, array2)

    println("Слитый отсортированный массив:")
    for (number in mergedArray) {
        print("$number ")
    }
}

fun mergeSortedArrays(array1: IntArray, array2: IntArray): IntArray {
    val result = IntArray(array1.size + array2.size)
    var i = 0

```

```

        var j = 0
var k = 0

        while (i < array1.size && j < array2.size) {
if (array1[i] < array2[j]) {
result[k++] = array1[i++]
        } else {
            result[k++] = array2[j++]
        }
        } while (i <
array1.size) {
result[k++] = array1[i++]
        } while (j <
array2.size) {
result[k++] = array2[j++]
        }
        return result
}

```

20)

21)

22)

The screenshot shows the IntelliJ IDEA interface with a Kotlin file named `Main.kt`. The code defines a `main` function that takes an array of integers and finds the second largest element. It uses a `findSecondLargest` helper function that iterates through the array to find the first and second largest values. The `main` function prints the result and handles edge cases like arrays with fewer than two elements.

```
1 fun main() {
2     val numbers = IntArrayOf(10, 5, 3, 7, 9, 1, 8, 2, 0, 4)
3
4     val secondLargest = findSecondLargest(numbers)
5
6     println("Второй по величине элемент: $secondLargest")
7 }
8
9 fun findSecondLargest(array: IntArray): Int {
10    if (array.size < 2) {
11        throw IllegalArgumentException("Массив должен содержать хотя бы два элемента.")
12    }
13
14    var first = Int.MIN_VALUE
15    var second = Int.MIN_VALUE
16
17    for (number in array) {
18        if (number > first) {
19            second = first
20            first = number
21        } else if (number > second && number < first) {
22            second = number
23        }
24    }
25
26    if (second == Int.MIN_VALUE) {
27        throw IllegalArgumentException("Второй максимальный элемент не найден.")
28    }
29
30    return second
31 }
```

The Run console shows the output: `Второй по величине элемент: 9` and `Process finished with exit code 0`.

23)

The screenshot shows the IntelliJ IDEA interface with a Kotlin file named `Main.kt`. The code defines a `main` function that creates three arrays, merges them into a single array, and prints the result. It uses a `mergeArrays` helper function that concatenates the arrays.

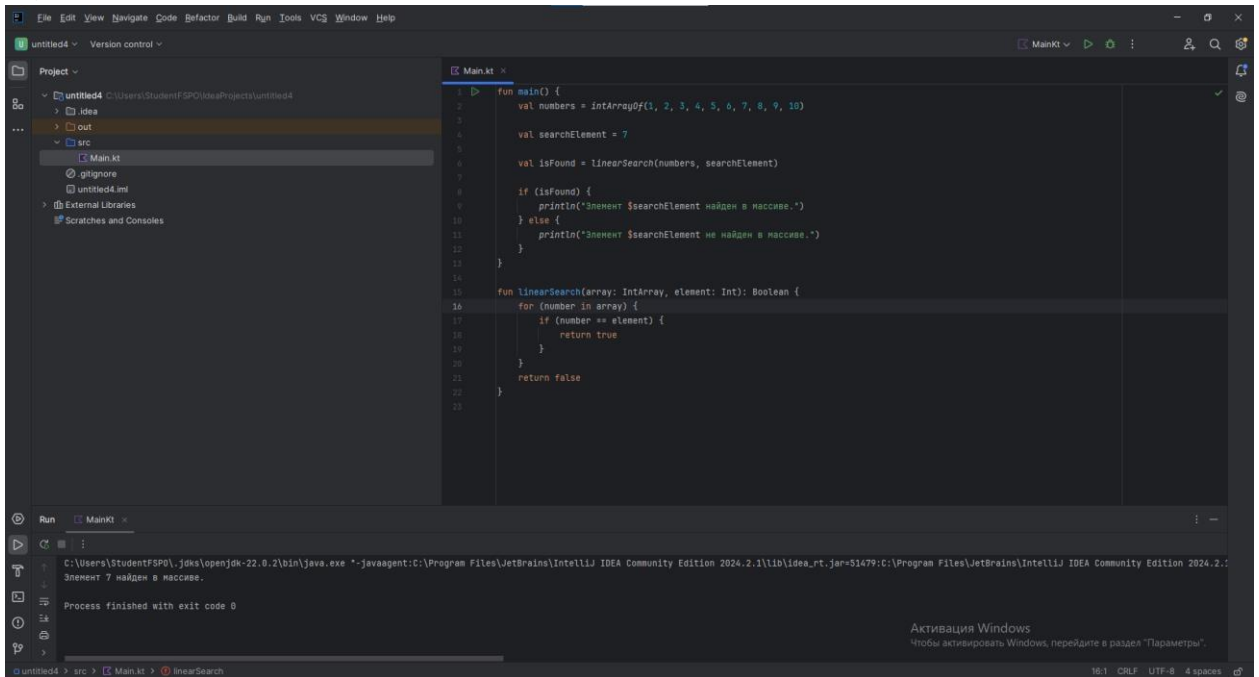

```
1 fun main() {
2     val array1 = IntArrayOf(1, 2, 3)
3     val array2 = IntArrayOf(4, 5, 6)
4     val array3 = IntArrayOf(7, 8, 9)
5
6     val mergedArray = mergeArrays(array1, array2, array3)
7
8     println("Объединенный массив:")
9     for (number in mergedArray) {
10        print("$number ")
11    }
12 }
13
14 fun mergeArrays(vararg arrays: IntArray): IntArray {
15    // Определение размера результирующего массива
16    val totalSize = arrays.sumOf { it.size }
17    val result = IntArray(totalSize)
18
19    var index = 0
20    for (array in arrays) {
21        for (number in array) {
22            result[index++] = number
23        }
24    }
25
26    return result
27 }
```

The Run console shows the output: `Объединенный массив: 1 2 3 4 5 6 7 8 9` and `Process finished with exit code 0`.
